(54) Title: SYSTEM AND USER INTERFACE FOR HANDLING A PERSON, AND METHOD THEREFOR

(57) Abstract: The invention relates to a handling system
(1) for lifting and/or moving a person from a first position
to another. The system comprises a frame including a base
frame (2a, 2b) and a lifting frame being part of a lifting de-
vice for said person. The system also comprises at least three
wheels (3a, 3b, 4a, 4b) positioned in different parts of said
base frame and allowing the handling system to be moved
over a surface from said first position to another, and at least
one user interface allowing said person or another person to
control the handling system. Further, the system comprises
at least one of said wheels (3a, 3b) being directional control-
lable from said at least one user interface and each of said
wheels (3a, 3b, 4a, 4b) being mounted pivotally around a ver-
tical axle (va1) for said wheels. The invention also relates to
a user interface and a method of handling a person.
